

2

International Summer School for Advanced Studies 2023

Space + Common Good

Social vulnerability, Active Communities, Self-built practices

Part I

19 and 26 July, Online

Part II

1 – 3 September, Pavia

Part III

4 – 10 September, Brescia

SCHEDULE

University of Brescia
Palazzo Calini, San Faustino n. 42
Aula n. 6

University of Pavia
Corso Strada Nuova n. 65
Aula Forlanini

Dormitorio San Vincenzo, Brescia
Via Carducci n.15/E

Via Moruzzi, Pavia

International Summer School for Advanced Studies 2023 + Space + Common Good Social vulnerability, Active Communities, Self-built practices

Directors

Barbara Angi, Barbara Badiani, Ioanni Delsante

Visiting Professors

Caroline Newton, Jorge Minguet, Aslihan Senel

Guest Lectures

Maria Giulia Bernardini, Sergio Boni, Giovanna Donati, Orsetta Giolo, Jo Muñoz, Diego Peris Lopez, Irene Peron, Marco Ranzato, Alberto Soci, Diego Torriani, Luca Trabattori

Tutors

Tabassum Ahmed, Fabrizio d'Angelo, Maddalena Düse, Luca Fogliata, Linda Migliavacca, Ilaria Maurelli, Nazila Salehnia, Buse Özçelik, Öykü Şimşek, Elif Nur Adigüzel

Scientific Committee

Barbara Angi, Barbara Badiani, Carlo Berizzi, Guido Cimadomo, Angelo Luigi Camillo Ciribini, Fabrizio d'Angelo, Ioanni Delsante, Ilaria Maurelli, Marina Montuori, Irene Peron, Marco Ranzato, Anna Richiedei, Alberto Soci, Michela Tiboni, Maurizio Tira, Giorgio Vassena, Silvia Mastrolembo Ventura

The ISS aims at offering an opportunity for design practice and reflection on the tools of architecture and urbanism, starting from the specificities of the place and the subjects involved. The workshop will range from reading the place, interacting with the subjects who live there, listening to and understanding the questions, designing, and presenting a solution, to the concrete realisation of an everyday object through the reuse of waste materials (bins, dustpans, plastic bottles, etc.) in a «ready-made» key. The course has two main objectives. Firstly, the ISS proposes a co-design experience to give students the opportunity to experience the relationship with the client, the collaboration between subjects with different competence roles. Secondly, the ISS aims at bringing students closer to architectural practices and the reading of urban space, combining the background of design culture acquired during university studies with considerations of undeniable topicality linked to a "circular" and "sustainable" approach to the reuse of materials.
