

Bachelor's degree in
Banking and Finance (Banca e Finanza)
Economics and Data Analysis (Economia e Analisi dei Dati)
Business Administration (Economia e Gestione Aziendale)
Economics and Management of Cultural and Creative Business (Economia e Gestione delle Imprese Culturali e Creative)
Students enrolled to the a.y. 2026/2027 (cohort 2026)

1. Assignment of OFA in mathematics (a.y. 2026/2027)

The Obblighi Formativi Aggiuntivi (OFA) di matematica are assigned to:

- 1) Students who achieve a score below the established threshold in the TOLC-E test. For the academic year 2026/2027, this threshold is set **at 4 scores out of 13 points in the “Matematica” section of the TOLC-E.**
- 2) Students who achieve a score below the established threshold in the CEnT-S test. For the academic year 2026/2027, this threshold is set **at 11 (normalized score) in the “Mathematics” section of the CEnT-S.**
- 3) Students who have not taken either the TOLC-E or the CEnT-S test.
- 4) Students who enrol late and have not taken either the TOLC-E or the CEnT-S or have taken one of the two tests (TOLC-E/CEnT-S) by obtaining a score lower than the fixed threshold, respectively.

Students with assigned OFA di matematica **can enrol in the first year of the Bachelor's Degree Programmes** but they are required to recover these OFA, as explained below.

The OFA di matematica will be assigned to students at the end of October 2026 and will be recorded in the student transcript as “Elementi di Base: Matematica”.

2. Recovery of the OFA di matematica (a.a. 2026/2027)

To fulfil the OFA in Mathematics, students enrolled in the first year of the academic year 2026/2027 have two options:

- **TOLC MODE:** Fulfilment of the OFA through the TOLC-E;
- **EXAM MODE:** Fulfilment of the OFA by passing either the final examination or the first mid-term exam for Matematica Generale/Matematica according to a schedule published on the following webpage: <https://www.unibs.it/en/ofa-economia>

TOLC MODE

Under the “**TOLC mode**”, students who need to fulfil the OFA in Mathematics may take (or retake) the TOLC-E test (TOLC@CASA or TOLC@UNI) during the academic year, within specific periods established by the Department of Economics and Management.

To take (or retake) the TOLC-E during one of the periods established by the Department, students must register directly on the CISIA website for one of the dates offered by any participating University. The available dates can be found on the following webpage:
<https://testcisia.it/calendario.php?tolc=economia>

Under the “TOLC option”, the OFA in Mathematics are considered to have been fulfilled if students obtain a score of at least 4 out of the 13 points available in the “Matematica” section of the TOLC-E.

Please note that the TOLC-E may be taken once per calendar month.

EXAM MODE

Under the “**Exam Mode**”, students can choose between two alternatives to recover the OFA:

1. **Alternative 1:** Fulfil only the OFA di matematica.
2. **Alternative 2:** Fulfil the OFA di matematica and, at the same time, take the first mid-term exam (in November 2026) of the course “Matematica Generale/Matematica I” or take the exam of the course “Matematica Generale/Matematica I” during one of the official exam sessions.

Students with OFA who choose **Alternative 1** must only register for the “Elementi di Base: Matematica” exam. In this case, the student can only fulfil the OFA di matematica.

Students with OFA who choose **Alternative 2** must complete two separate registrations: first, they must register for the “Elementi di Base: Matematica” exam and then for the “Matematica Generale/Matematica I” exam or the “Matematica Generale/Matematica I” first mid-term exam. Depending on the score obtained, students may fulfil their OFA and possibly pass the “Matematica Generale/Matematica I” course exam or the mid-term exam.

To recover the OFA di matematica via the “**Exam Mode**”, students must obtain:

- a score of at least 9 out of 30 in the “**Elementi di Base: Matematica**” exam, which is linked to “**Matematica Generale/Matematica I**” course.
- or
- a score of at least 9 out of 30 in the first mid-term exam of the course “**Matematica Generale/Matematica I**” (scheduled for November 2026) or in one of the exams of the course “**Matematica Generale/Matematica I**”.

IMPORTANT REMARK

Please note that the exam of “**Elementi di Base: Matematica**” is identical to the exam of the course “**Matematica Generale/Matematica I**”.

Therefore, to recover the OFA di matematica, students must study the contents of the course “**Matematica Generale/Matematica I**”.
