University of Brescia

May 19th, 2022

10.00 hrs CEST (UTC+2)

Sala Biblioteca, S. Faustino building

Live presentation on: Google Meet

[Registration form here >>](#)

ABSTRACT

While emotions are universal aspects of human psychology, they are expressed differently across different languages and cultures. This seminar is based on the study of a new data set of over 530k anonymized public Facebook posts across 18 languages, labeled with five different emotions. Using multilingual BERT embeddings, it is shown that emotions can be reliably inferred both within and across languages.
