Nottingham Trent
University

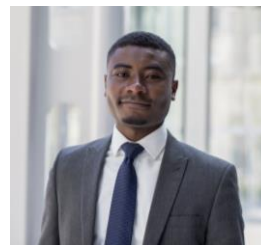

Financial Markets & Investment Analysis

Join this course for a practical overview of the global financial markets and examine some of the common financial asset classes. You will gain the skills required to analyse financial assets and exploit market opportunities.

On successful completion of this course, and by doing some extra work outside of the summer school, you will receive the Bloomberg Market Concepts Certificate.

This course is ideal for business, accounting and finance, and economics undergraduate students.

Course Tutor

Dr Solomon Deku
Senior Lecturer
Nottingham Business School

A Sociology of Global Health & Development

A critical exploration of reverse knowledge innovation and action in global health and development. This course will encourage you to challenge the traditional assumptions around the production of the flow of knowledge, particularly within the global health and development arenas.

Delivery will be in collaboration with the Universities of Ouaga II, West Africa, Makerere University, Uganda, & University of Minnesota, USA.

This course is ideal for undergraduate students with an interest in this area.

Course Tutors

Linda Gibson
Associate Professor
School of Social Sciences

Dr Natewinde Sawadogo, Thomas Sankara University, Burkina Faso

Dr David Musoke, Makerere University, Uganda

Dr Marzell Gray, University of Minnesota, USA

Financial Mathematics

Explore the main topics in financial mathematics and improve your mathematical understanding of the financial products used in the financial industries.

The course will cover applications of geometric series – annuities, sinking funds, mortgage and debt repayments, options – general properties, put/call parity, bounds on option prices, option pricing using the binomial model, the Cox-Ross-Rubinstein form, and the Black-Scholes formula for pricing derivatives.

The course is ideal for business students who want to improve their mathematical understanding, and mathematics students who are considering a career in Finance.

Course Tutor

Dr Zuzana Hucki
Senior Lecturer
School of Science &
Technology

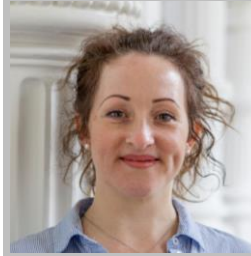

The Transformational Leader & the Sustainable Development Goals

This online course explores leadership and contemporary challenges through the lens of the United Nations Global Goals for Sustainable Development. You will:

- Explore what it takes to be a transformational leader in view of the sustainability challenges facing the world right now
- Look at how different academic disciplines are tackling global issues and the potential for multi-disciplinary collaboration to end poverty, protect the planet and ensure prosperity for all
- Have the opportunity to undertake cutting-edge Carbon Literacy Training.

This course is ideal for undergraduates with an interest in the sustainable development goals.

Course Tutors

Vanessa Odell & Katalin Butt-Bethlendy
NTU Green Academy

The Psychology of Positive Human Functioning

Would you like to be happier and more fulfilled? Help yourself and others by joining us for an exciting and transformative journey through the philosophical and practical foundations of well-being and happiness.

This course will address the imbalance of the traditional focus of psychology on the understanding of and treatment of problems people experience, by exploring their strengths and well-being, and uncovering their true potential! This course is ideal for undergraduate students with an interest in this subject.

Course Tutors

Dr Glenn Williams
Principal Lecturer
School of Social Sciences

And

Dr Ed Griffin
School of Social Sciences

English Legal System & Applied Skills

Join us for an interactive introduction to English law and legal practice. This interactive course will include: an introduction to common law and the English legal system; an overview of some of the present topical issues in English law; an insight into the working life of a solicitor or barrister; an introduction to comparative and international law; a hands-on introductions to negotiation and mediation.

This course is ideal for undergraduate law students from outside of the UK, and non-law students who are looking for an introduction to English Law.
