Rationale

Viruses have brought humanity numerous challenges: respiratory infections, cancer, neurological damage, and infections immunosuppression related. Virological research has responded to mitigate this illness burden with vaccines, antivirals, and innovation in the diagnosis. Nevertheless, the COVID-19 pandemic has led to unprecedented attention to the virology field.

A carefully balanced, evidence-based discourse is essential to address public concerns while maintaining and expanding needed research in virology. To respond rapidly to emerging viral threats, we must be able to apply up-to-date biological tools to viruses that will enable us to reduce the impact of future epidemics.

The SIV-ISV National Congress represents the annual meeting for the Italian scientists working in the different areas of virology involving basic, clinical and translational research. Moreover, the meeting will offer a superb platform for virologists, epidemiologists, pathologists, physicians, medical specialists and all healthcare professionals to attend expert updates and to share and exchange best practices, knowledge and experiences in order to establish networking and collaborations among world-wide academic and clinical professionals.

In keeping with the tradition, the scientific structure of the Congress features different thematic sessions. The congress continues to provide a global forum with an interdisciplinary approach, featuring keynote talks, plenary sessions, workshops, debates, posters and interactive discussions examining novel and exciting advancements in the management and treatment of a various emerging and re-emerging viral diseases.

Special attention has been given to Young Investigators whose participation has been encouraged by Scholarships. The 8th National Congress of the Italian Society for Virology has been accredited to the Italian Ministry of Health for CME Credits for the following professionals: Medical Doctor (all disciplines), Biologist, Biotechnologist, Medical laboratory technician, Nurse, Veterinary, Pharmacist, Physicist and Chemist.

Join your colleagues in the beautiful Bologna to hear the latest **research activities in different disciplines of virology in line with our mission “One virology, One Health”**. We are certain that your participation or presentation at the conference will contribute significantly to its success.

Abstracts

Abstracts will be reviewed by the Scientific Committee and may be selected for either **oral or poster presentation**.

Authors who wish to present scientific works are requested to send abstracts by **May 6th, 2024** using ONLY the online form on the **www.congressosivsv.com** website.

Authors must specify their preferred form of presentation (oral communication or poster) when sending their abstracts. The choice is not binding.

By **May 13rd, 2024**, the organisational secretariat will send emails confirming acceptance of the selected works and the presentation mode (oral communication or poster).

ORAL COMMUNICATIONS

The time limit for oral communications is 15 min, including discussions.

POSTER

Poster dimensions should be 70 cm. (width) x 100 cm. (height).

Mounting materials will be provided in the posting area.

The presence of one of the authors is required at the discussion of the posters.

ABSTRACT SUBMISSION GUIDELINES

- The text, in English, must contain (in the following order):
 - **Topic**: indication of the preferential topic
 - **Title**: title of abstract (short, written in UPPERCASE letters)
 - **Author(s)**: Initial of first name followed by surname, initials in uppercase, without academic title; underline name of Author who will present the work.
 - **Affiliation**: name and location of institution.
- Use the Word programme (Times New Roman, font size 12, single-spaced)
- Maximum length: 1 page.

CONTENTS

The abstract must contain:

- Aim of the study
- Methods used
- Results and conclusions

Any bibliographic citations must be inserted in the text. Summary tables or graphs may be included provided they fit on the page of text.

EDUCATIONAL GRANT

Sponsorship of registrations by companies adhering to the MEDTECH EUROPE and ASSOBIOMEDICA code of ethics. We inform you that with the entry into force of the Assobiomedica and MedTech Europe Code of Ethics, since direct invitations by Assobiomedica/Medtech associated companies are prohibited, the participation of professionals in the Congress in question may take place through educational grants. We will contact the Health Bodies, according to the profiles that will be communicated to us by the companies, to obtain the names of the professionals to whom the training packages will be allocated. The identified recipients will receive a communication from the Nadirex International organizational secretariat with information relating to the type of package assigned.
