

**MASTER'S DEGREE IN
ANALYTICS AND DATA SCIENCE FOR ECONOMICS AND MANAGEMENT**

A.Y. 24-25

Admission Test

The Admission Board requests applicants an oral interview for admission, held in English language and done via Teams. The oral interview is aimed at verifying the individual knowledge and skills in three main fields: Computer science, Mathematics and Statistics. The table below reports a detailed list of topics, together with references, that can be asked during the interview.

Field	Topics	References
Computer science	<p>Information Technology:</p> <ul style="list-style-type: none"> - PC architecture. - Operating systems. - Computer networks. - Information formalization: binary, analog, digital coding. - Information processing: flow charts and algorithms. - Information management: relational databases. - Access to information: Web and search engines. <p>Spreadsheets:</p> <ul style="list-style-type: none"> - Basic concepts. - Formulas and basic mathematical functions; some specific functions: IF, AND, OR, COUNTIF, SUMIF, VLOOKUP, CONCATENATE, MID - Handling lists. - Goal Seek and Solver. - Charts. - Pivot tables. 	<p>F 1, 2, 4, 5, 6, 8</p> <p>DCBE 1, 3, 4</p>
Mathematics	<ul style="list-style-type: none"> - Matrix and vector algebra, rank of a matrix, determinant and inverse matrix, systems of linear equations. - Real functions of one variable - Calculus for function of n-variables, optimization of function of n- variables, constrained optimization. - Series. Integration. 	SB
Statistics	<p>Theory and application of the following topics:</p> <ul style="list-style-type: none"> a) Data description, summary, and interpretation - frequency tables and graphs 	CDM-E 1-23

	<ul style="list-style-type: none"> - statistical measures of central tendency, variability, asymmetry, inequality - simple and composite index numbers - multi-way tables; conditioned distributions and indexes <p>b) Probability theory: discrete and continuous random variables</p> <p>c) Statistical inference</p> <ul style="list-style-type: none"> - point and interval estimation - tests of hypothesis <p>d) Bivariate and multivariate analysis</p> <ul style="list-style-type: none"> - Association and independence test - Mean dependence and ANOVA - Simple and multiple linear regression model 	McCS 10 (no 10.5), 12.1-12.4, 12.11-12.12
--	---	---
