

4th Colloquium on the Physics and Applications of Metasurfaces

Università
di Brescia

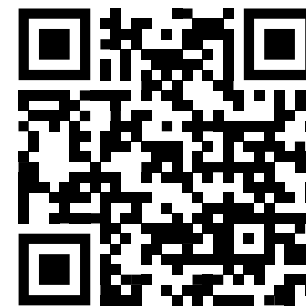

21-24 April 2026

Università degli Studi di Brescia- Italy

We are delighted to welcome you to the 4th Colloquium on the Physics and Applications of Metasurfaces. Following the success of previous editions held in Cargese (2021), Firenze (2022), and Zurich (2024), this year's colloquium aims to continue fostering innovation and collaboration in the field of metasurfaces.

Scope and Topics: The colloquium will focus on recent advancements and future perspectives in the physics and applications of metasurfaces including, but not limited to:

- Fundamental principles of metasurfaces
- Design and fabrication techniques
- Structured light
- Holography and advanced imaging systems
- Polarimeters and polarization-sensitive devices
- Nonlinear optical interactions
- Quantum optical components and systems
- Optical Computing
