

*The Applied Seismology and Structural Dynamics Research Center
at DICATAM, University of Brescia coordinates the*

International Workshop

Studies of seismicity induced by gas storage

Friday 1 June 2018

Aula Consiliare di Ingegneria
Via Branze 38, Brescia

11:30 **Dr Loes Buijze, TNO Utrecht**

Seismic events induced by gas reservoir production: how do they start, and what controls their size?

12:30 Lunch Break

14:00 **Prof. Alessandro Maria Michetti, Università dell'Insubria**

Fagliazione superficiale, forti terremoti e stoccaggio del gas in Pianura Padana: il caso di Monte Netto

The workshop is free.

Participants are invited to register by sending an email to francesca.fantoni@unibs.it
