

G.M. La Vecchia is full professor of Metallurgy at the University of Brescia – Department of Mechanical and Industrial Engineering. She was graduated at Politecnico of Milan and obtained a PhD in Metallurgical Engineering at Politecnico of Turin.

Her main research topics are: mechanical and microstructural characterization of metallic alloys produced by different technologies (sintering, additive manufacturing, forging, etc.); mechanical and corrosion characterization of coating; failure analysis characterization.

Member of the AIM Executive Council (Italian Association of Metallurgy) during the years from 2002 to 2009 and 2014-2018.

Responsible of the Research Council in the DIMI during the period 2012-2016.

Since November 2016 she is the DIMI director's delegate to the Third Mission and department laboratories activities.

Since November 2017 she is responsible for the DIMI security.

Since October 2018 she is member of the Third Mission Commitment.
